SAFE DEPOSIT BOXES

MEGASAFE'S Stainless Steel Safe Deposit Boxes and Lockers are produced to exacting standards combining quality craftsmanship and advanced materials.

Construction

Reinforced coated steel modular case with front frame constructed of precisely extruded aluminum profiles that are anodized for endurance. All sections have provisions for securing adjoining sections at top, bottom and sides. Removable storage boxes are provided for all safe deposit boxes.

Standard Dimensions (mm): Dim. 1 80 x 330 x 500 Dim.2 120 x 330 x 500 Dim.3 160 x 330 x 500 Dim.4 200 x 330 x 500

*Custom sizes are available upon request

Numbering

Flexible numbering system with black characters on a silver tone background. Set in a frame which complements the stainless steel finish.

Base

Heavy tubular steel base with stainless steel trim plate and leveling legs. Bases are pre-drilled to accept 500 series sections.

Doors

Maintenance free doors are constructed of 6mm steel andcovered with 2mm stainless steel making an over all thickness of 8mm door. Each and every door is identically machined for a precise fit and maintenance free stainless steel finish.

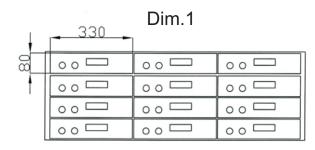

Locks and Hinges

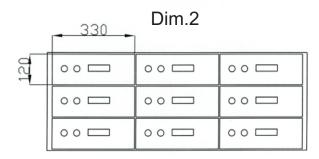

Double nose U.L. listed locks with two customer keys each and one keyhole for the Trezor guard's key. Both the customer's key and guard's key are needed to openthe safe deposit lock. Locks and hinges are furnished with non-tarnish brass finish. The hinges are concealed behind the door forming an elegant and modern design. Each lock interlocks with the frame.
